| C63 [®] | Annex A | | | Just found what appears to be a pretty fundamental mistake in the EdMax text, in that equation A.1 is in linear units and A.2 is in dB, and all the formulas in equations 4-8 that use EdMax are in dB. Minor problem given those of us that use it know the difference, but still a problem. | | You are correct; equation A.1 is with linear units. Annex A is an informative annex and provides additional information for the user about E_d^{\max} . The normative narrative in clause 5 and in table 2 lists E_d^{\max} with log units and is self-consistent. |
