4.	**This standard contains excerpted text from an ISO or IEC standard, but is not an ISO or IEC adoption.**	Check here if this standard includes excerpted text from an ISO or IEC standard but is not an identical or modified adoption of an ISO or IEC standard.
5.	**Provide a brief explanation of the need for the project:**	**Changes have been made in the past six years in immunity testing, including updates in the standards referenced in C63.15-2010. In addition there is an interest to include automotive and other immunity test methods. Manufacturers need the updates and additional test methods to better make their products immune in the electromagnetic environments where they are intended to be used.**
6.	**Identify the stakeholders** (e.g., telecom, consumer, medical, environmental, etc.) **likely to be directly impacted by the standard:**	**EMC test laboratories, EMC test equipment manufacturers, product manufacturers, regulators**
7.	**This PINS revises a previous PINS submittal:**	Note: A revised PINS is only required if the previously identified stakeholders have changed substantively (see item 6 on this form.).
8.	**Description of Contents of Standard:** (Provide a one paragraph description, not to exceed 500 characters.)	The amended standard will update radiated and conducted immunity test methods using updated references of common immunity test methods published by the IEC, MIL STD, ISO, and SAE. The ISO and SAE test method addition applies to automobiles. There is also the addition of testing for quasi-static fields, proximity fields, and fields from overhead power lines.
