Date:	11/7/2017

This form may be submitted via E-mail to s.vogel@ieee.org

PINS: PROJECT INITIATION NOTIFICATION SYSTEM FORM *(Effective 01.01.08)*

*NOTE: Adoptions of an ISO or IEC standards require compliance with the *ANSI Policy Regarding Rights to Nationally Adopt IEC and ISO Standards or Otherwise Use IEC and ISO Material* and with the *ANSI Procedures for the Adoption of ISO and IEC Standards as American National Standards.*

1. Designation of Proposed Standard:	C63.25.2	
2. Title of Standard:	Draft Standard for Validation Methods for Radiated Emission Test Sites, 30 MHz to 1 GHz	
3. Project Intent: (Check the applicable box below)	**3a. Supersedes or Affects:** (Specify designation of approved ANS standard(s) to be superseded and/or ISO or IEC standard(s)* to be adopted)	
Create new American National Standard (ANS)	X	
*Adopt identical ISO or IEC standard		
*Adopt modified ISO or IEC standard		
***AND** this adoption revises this current ANS		
Revise current ANS		
Revise and Redesignate current ANS		
Revise, Redesignate and Consolidate current ANS		
Revise and Partition current ANS		
Reaffirm current ANS		
Reaffirm and Redesignate current ANS		
Addenda to a current ANS under Continuous Maintenance: (this document relates to/updates the following base document that is registered under Continuous Maintenance)		
Supplement to current ANS		
Withdraw current ANS		
Maintain ANS under stabilized maintenance		
4. This standard contains excerpted text from an ISO or IEC standard, but is not an ISO or IEC adoption.		Check here if this standard includes excerpted text from an ISO or IEC standard but is not an identical or modified adoption of an ISO or IEC standard.
5. Provide a brief explanation of the need for the project *(see 2.5 of the ANSI Essential Requirements)**:***	This project will create a standalone standard for Normalized Site Attenuation (NSA) measurements from 30 MHz – 1000 MHz. This standard will incorporate, as necessary, Annex D of ANSI C63.4a:2017 as well as include any necessary information from C63.4:2014 and C63.5:2017 related strictly to NSA (e.g. Antennas allowed to be used, geometry-specific correction factors for biconical dipoles used in normalized site attenuation measurements). This standard can then referenced by other ANSI C63 standards where NSA requirements are necessary.	
6. Identify the stakeholders (e.g., telecom, consumer, medical, environmental, etc.) **likely to be directly impacted by the standard** *(see 2.5 of the ANSI Essential Requirements)*:	EMC test laboratories, test equipment manufacturers, EMC software manufacturers, accreditation bodies and regulatory authorities.	
7. This PINS revises a previous PINS submittal *(see 2.5 of the ANSI Essential Requirements)*:		Note: A revised PINS is only required if the previously identified stakeholders have changed substantively (see item 6 on this form.).

8. Description of Contents of Standard: (Provide a one paragraph description, not to exceed 500 characters. Please note in the scope if this standard is intended to be submitted for consideration as an ISO or ISO/IEC JTC-1 standard.)		This standard will contain the methods to conduct Normalized Site Attenuation from 30MHz – 1000MHz
9. Request an Announcement in Standards Action to Solicit New Consensus Body Members (Note that participants from diverse interest categories shall be sought with the objective of achieving balance. See 1.3 and 2.3 of the *ANSI Essential Requirements*.)		Check here to request the publication in Standards Action of a call for membership on the relevant consensus body.
10. Consumer Product or Service:		Check here if standard covers Consumer Product or Service
11. Accredited Standards Developer Acronym:		
12. Submitter: (Specify Accredited Standards Developer submitter's name and complete contact information, address, phone, email, etc.)	Name:	Robert DeLisi
	Title:	Principal Engineer
	Organization:	UL LLC
	Address:	1285 Walt Whitman Rd.
	City, ST, Zip:	Melville, NY 11747
	Phone:	631-546-2452
	Fax:	631-546-2452
	Email:	bob.delisi@ul.com
