

Update on C63.10

M. Windler for A. Wall
October 10, 2008

Update on C63.10

- New standard for Unlicensed Wireless Devices
- First draft ONLY consolidates existing requirements and second draft will improve on those requirements

Update on C63.10

- C63 ballot closed August 28th
- One negative ballot
- >250 comments, mostly editorial
- Resolution committee
 - Art Wall
 - Bill Hurst
 - Mike Windler

Update on C63.10

- From Art Wall:
- Both the resolution of the comments and the revised draft are just about ready for re-balloting within the balloting group. The only remaining work is: (1) incorporating last minute FCC comments, and (2) resolving the remaining inconsistencies between the figures and the text, which is taking a bit longer than expected.
- We should be ready to have IEEE to circulate the ballot by early next week.
