- Current Working Group Membership
 - Brench, Colin
 - Camell, Dennis
 - Heirman, Donald N.
 - Hofmann, H R (Bob)
 - Hoolihan, Daniel D.
 - Schaefer, Werner
 - Windler, Mike
 - Zhong Chen

C63.25 Working Group Update

- PINS approved in October 2008 by the consensus body
- Requirements for radiated emissions test sites including open area tests, semi-anechoic rooms below 1 GHz and partially absorber lined open area tests and semi-anechoic rooms above 1 GHz.

Outline of Draft C63.25

- Copy below 1 GHz requirements (performance and construction)
- Include by reference SVSWR
- Include new Time Domain method
- Develop comparison annex between TDR and VSWR
- Annex's - MUC for both TDR and VSWR

Next Steps due May 1

- Review TDR method (clause 6) and annex B
- NSA from C63.4 - edit clause 5 and annex A
- Add a stake in the ground for mode stirred (clause 9)
- Review correlation of SVSWR and TDR compliance (annex E)
- Develop MUC for SVSWR and TDR
